

MINZONE

Bioavailability and Profitability

Highly Bioavailable Trace minerals in Nano particles form

Trace minerals are indispensable components in poultry diets. Essential trace minerals such as zinc, copper, manganese, Selenium, Calcium, Phosphorus, Chromium and Iron etc.. Play a wide variety of biological and physiological roles in animal development and health. These minerals take part in the **antioxidant defence and DNA repair, bone and tissue development, and immune function.**

Minzone helps to improve the bio availability are essential to deliver the nutrients required by the birds. Minzone excellent stability, reliability, flow ability and better bioavailability.

Minzone bioavailability has been enhanced by increasing the surface area of respective minerals by making their nano-particles. Animal gets sufficient minerals in their daily diet and optimally maintain their overall health condition and performs well.

Benefits:

In Broilers :

- Minzone lymphoid organ weights, apparent digestibility, and bone mineralization.
- Minzone allow the birds to reach its genetic growth potential and prevent clinical deficiencies.
- Minzone decreases Mortality and improved longevity
- Minzone improves minerals bioavailability in poultry birds
- Minzone helps to alleviate oxidative stress as well as heat Stress
- It is Involved in anti-Oxidative defence system, protein metabolism and bone formation as superoxide dismutase transferases, hydrolases and lygases

In Layers and Breeders :

- It improves fertility , hatchability and egg production in layer birds
- Helps to alleviate oxidative stress as well as heat Stress
- It improves the egg weight with significant reduction in egg loss without compromising the feed efficiency and egg shell quality in older laying birds.
- Prevents mineral deficiency symptoms liver disorders production fluctuations general mortalities.
- It is also play a vital roll in egg production growth, body weight, digestion, disease resistance.

Composition:

Zinc	80 grams
Copper	15 grams
Manganese	80 grams
Iron	40 grams
Iodine	1 gram
Selenium	0.5 grams
Cobalt	QS

Dosage:

Broiler and Layers	:	1 kg per ton of feed.
Breeders	:	1.5 kg to 2 kg per ton of feed.

Store at below 25°C in Cool & dry place

Animal Feed Supplement

Manufactured and Marketed by :

Registered Office :
No. 11, VOC Street, Ponmalaipatti,
Trichy - 620 004, Tamilnadu, India
