

# NEEDICAL

## An enriched Calcium supplement for Livestock

Calcium is also essential for optimum milk production and growth rate. Calcium is one of the main components of bone and so is an important but often overlooked factor in achieving proper growth in young cattle. Growth rate is slower if calcium intake is inadequate. Where intake is severely deficient rickets, weak skeleton or even bone fractures are possible.

Needical plays a vital role by providing sufficient calcium metabolism which is essential part of animal health.

### Benefits:

- Increases milk production & optimizes fat level in milk in cattle.
- Improves skeletal and muscular strength in cattle.
- Prevents milk fever and rickets in cattle.
- Increases disease resistance & heals any cuts & wounds quickly in cattle.
- Making stronger bones & prevent bones related disease in cattle

### Composition:

Combination of Calcium Organic, Vitamin D3, Vitamin B12, Carbohydrate, Phosphorus, Zinc, Magnesium, etc.

Dosage	:
Cow, Buffalo & Horse	: 50-75 ml each animal per day.
