

VITMIX

Vitamin AD₃EK+H - Most efficient and healthy combination for livestock and fish

Therefore, the ideal solution for breeders is to supplement animal foods with the necessary vitamins that are hard to balance in the feed but which play a key role in the first phase of life. The product strengthens the body's protective barriers and acts protectively on the liver, kidneys and muscles. It helps to increase Milk Holding Capacity of the Under - It helps to improve Shining in Calves - It acts as a Growth Promoter - Restore & Regular Milk Yield after any Disease - It Acts as a Energy booster in Weak Animals.

Properly composed of **VITAMINS**, the animal feed formulation simply requires laboratory procedures, and in today's world of mass feeding that is virtually impossible.
