

NEEDICAL

An enriched calcium supplement for Livestock

Calcium is an essential element for optimum milk production and strong bone strength for milking and meat animals. Calcium is one of the main components of bone but often overlooked factor in achieving proper growth in young cattle. Growth rate is slower if calcium intake is inadequate. Where intake is severely deficient rickets, weak skeleton or even bone fractures are possible.

Needical plays a vital role by providing sufficient bioavailable calcium through easy metabolism which is essential part of animal health.

Benefits

- Increases milk production & optimizes fat level in milk in cattle.
- Improves skeletal and muscular strength in cattle.
- Prevents milk fever and rickets in cattle.
- Increases disease resistance & heals any cuts & wounds quickly in cattle.
- Making stronger bones & prevent bones related disease in cattle.

Composition
